

Supervised Agricultural Experience

We will sit down and plan a SAEP (project) that fits the student's interests. A combination of the following methods may be used:

1. SAEP at student's home.
2. School garden.
3. Work experience or job shadowing.
4. Lakeside River park or community service
5. Agriculture Science Fairs or displays.

Examples of SAEP'S

- Attend agriculture meetings
- Career research
- Community volunteer work
- Construct and sell or install bird houses
- Make a flower or vegetable garden at home
- Home landscape
- Job shadow
- Monitor a stream for pollution
- Bay clean up
- Plant sales
- Pet care
- Plant experiments
- Science and agriscience fairs
- Raise and show animals at fairs
- Conduct soil tests
- Volunteer at humane society

Agriculture education's hands-on, real life experiences are fun and motivate students to learn!
