# **School Reopening Update**

Lakeside Union School District Board of Trustees Meeting October 8, 2020 Andy Johnsen, Ed.D., Superintendent

# **Topics**

- Reopening timeline of events
- LUSD Distance Learning/Home Flex/In-person enrollment
- Phase 2 reassignment of students/staff (Cesar Morales, Executive Director, HR)
- **Cleaning/disinfecting protocols** (Todd Owens, Director, Maintenance, Operations, Transportation)
- LUSD Staff/Students in self-isolation or quarantine (Dr. Natalie Winspear, Executive Director, Pupil Services)
- **Protocol for positive cases** (Dr. Natalie Winspear, Executive Director, Pupil Services)
- **COVID testing for staff** (Cesar Morales, Executive Director, HR)
- Staff & Parent ThoughtExchange survey results
- Phase 3 options for the Board of Trustees to consider

# **Reopening Timeline**

- June 29: SB 98 requires LEAs to offer in-person instruction to the greatest extent possible
- July 17: Gov. Newsom orders schools in counties on the watchlist to operate via distance learning
- Aug. 18: San Diego County comes off the watch list
- Aug. 28: Governor announces new tier system
- Sept. 1: Schools in San Diego County allowed to reopen
- Sept. 14: LUSD begins in-person instruction for Special Day Class students
- Sept. 21: LUSD begins in-person instruction for general education students (Phase 2 of reopening plan)

### **LUSD Phase 2 Enrollment**

In-Person 2 days/week

Elementary: 2540 students Middle School: 1129 students (approx. 78%)

Distance Learning 5 days/week

> Elementary: 541 students Middle School: 373 students (approx. 19%)

Home Flex

Elementary: 85 students Middle School: 13 students (approx. 2%)

# Phase 2 Reassignment of Students & Staff

(Cesar Morales, Executive Director, HR)

# K-5 Distance Learning Strand (DLS) Evolution

#### HVAC protocols

All learning quotes and workspaces are equipped with individual MMC systems or "package units". An MAC years contain the unit and and the context spaces of the seriest generally sources in "Years and the seriest space of the unit and the seriest general package and the seriest general package and the control seriest space of the seriest spaces. The seriest general package and the package the parentipe participe package to the function space of the seriest general package the parentipe participe package. The effective seriest and efficiency of MAC systems to filter and conteminants during the consideral package to beind upon to the theory.

 Air mixture - the amount of outside air brought in compared with the amount of inside, recirculated in it is mixed with, generally expressed as a percentage Filtration - the ability of the system to filter out and remove particles and contaminants from the air before it is circulated back into the room.

The District's HVAC systems are equipped with "economizers" that vary the amount of outside air The District IVAC splane are expanded with "scannarisms" that way the annual of instable at longing in engagening the exclusion trensports and controls. The firstance for therems is AVAC splane is measured by an instaburg tradead in some in a Minisma filterance for particle (site and MIN), and the exclusion of the origination is measured by an instaburg tradead in some in a Minisma filterance for a splane of the exclusion of the exclusion of the exclusion of the splane material splane filterance for the splane filterance for the splane filterance of the splane materials and an attraction of the splane filterance for the splane materials are not exclusion of the splane and and the particle filterance of the splane materials are not exclusion and the integration. The forther, decisions on the trage of the traction filterance of the splane materials are not exclusion of the splane filterance. The materials are integrated as the splane materials are integrated filter and the splane filterance filterance of the splane materials are not exclusion and the splane filterance that and the splane filterance of the splane materials are not exclusion and the splane filterance that and the splane filterance of the splane materials are not exclusion and the splane filterance that and the splane filterance of the splane materials are not exclusion and the splane filterance that and the splane filterance of the splane materials are not explane and the splane filterance that are splane filterance and the splane filterance of the splane materials are not explane filterance and the areas of the splane filterance of the splane material splane filterance and areas areas and the splane filterance of the splane materials are not explane filterance and the areas areas and the splane filterance of the splane material splane filterance and the areas areas and the splane filterance of the splane material splane filterance and the area considered.

Currently our district uses MERV 8 filters that are changed 4X a year (January, April, July and October)

- For the 2020-21 school year we will still be using the MERV 8 filters however we plan to change the a year.
- Also the district plans to set the High? to sun the circulatine fan in the on position during the instructional day. This is to increase air flow even when the unit is not in the heating/cooline mode.

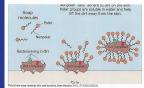

#### Outside the Box

The coronavirus is no match for plain, old soap here's the science behind it Published: April 8, 2020 at 4:20 n.m. ET

By Palli Thordarson

Scop works better than alcohol and disinfectants at destroying the structure of viruses

Why does soap work so well on the new coronavirus and, indeed, most viruses? Because it is a self assembled nanonarticle in which the weakest link is the linid (fathy) billower

#### That rounds relaatifier Lat me contain

Scop dissolves the fat membrane, and the virus fails apart like a house of cards and "dies," or rather, it becomes inactive as viruses aren't really alive. Viruses can be active outside the body for hours, even

Disinfectants, or liquids, wipes, gels and creams containing alcohol (and scop) have a similar effect but Nerfly vincers are no match-for glain do exap haves the edence-baland-6.2020-03-00

# COVID Custodial Duties

Each school will implement strict procedures for cleaning, disinfecting and sanitzing regularly to prevent the spread egrems, including the convolves. Although custodians are primarily responsible for achieving this goal, it is also the responsibility of all school staff members to be mindful of their behavior and to clean and disinfect when and where they can. The sately of all staff members and students depends upon the individual sciences of actions of each staff member. One or two individuals cannot carry the load. It is up to everyone to participate in the process in order to achieve the highest level of leannines possible. To that end, the cleaning and sanitzing process will occur in layers:

#### **Custodial Expectations**

- Your site custodian will develop an hourly routine in which will be followed throughout the day for disinfecting frequently touched areas.
- Cleaning and disinfecting student and staff restrooms every 60 minutes. A log will be posted and
  maintained in each student and staff restroom to indicate when cleaning/disinfecting efforts
  occurred.
- Monitoring the supplies of soap, hand sanitizer, disposable facemasks, face shields, and Dawn soap
  and water and disinfecting sprays throughout the day and stocking when appropriate.
- Providing Campus Aides with the cleaning and disinfecting supplies for disinfecting of lunch tables between meal periods and playground equipment.
- Day custodial staff will focus on disinfecting frequently touched points (Door handles, Light switches, faucets, dispensers, bottle filling stations, handwashing stations, etc.) throughout the campus on a regular routine (approximately 1-hour cycle) in addition to completing their regular duties.
- Night custodial staff will focus on cleaning and disinfecting interior classroom frequently touched points (desks, sinks, faucets and other objects inside the classroom) in addition to completing their regular duties.
- The District will attempt to hire additional staff to help day and night custodial staff with the
  additional work demands.

#### Frequently Touched Surfaces

- Light switches hourly
- Toilets hourly
- Sinks hourly
- Railings hourly
- Faucets hourly
- · Handwashing stations hourly

#### Cleaning and Disinfecting

Cleaning and disinfecting are important factors in stopping the spread of germs and viruses. Any user cleaning with Dawn soap and water and/or disinfecting with Waxie HP730 disinfectant must read the label for what they are using and follow the directions and use of PPE. In addition, users of disinfectants/wipes are required to be certified through the Department of Pesticide Regulations if using a disinfectant in a school setting.

#### Classroom Recommendation

- Reduce the amount of clutter in the classroom
- Remove items on frequently touched areas (desks and counters, etc.) for nightly cleaning
- Have room ready to be cleaned and disinfected nightly
- Keep any cleaning and disinfecting supplies out of reach of students
- Spray bottles of Dawn soap & water will be provided, 730 disinfectant will be made available at the teacher's request

Tables and chairs - nightly
 Any other objects with a high frequency

Bottle filling stations - hourly

of use

Door handles - hourly

Phones - nightly

# **WAXIE 730 HP** Disinfectant

#### PRODUCT SPEC SHEET

#### WAXIE Solution Station® 730 HP Disinfectant Cleaner

#### DESCRIPTION

A one-step. Hydrogen Peroxide based product for disinfection, cleaning and deodorizing, Cleans quickly by removing dirt, grime, mold and mildew stains, body oils and other common soils found in hospitals, nursing homes, office buildings, schools and colleges, and many other locations. For use on any hard, nonporous washable surface where disinfection is required. Contains Hydrogen Perceide. Kills SARS-Related Coronavirus 2 (SARS-CoV-2), the virus responsible for COVID-19, in one minute.

\*Custodial subsitutes will be critical, we have very few subs

# **HVAC Protocols**

#### **HVAC** protocols

All learning spaces and workspaces are equipped with individual HVAC systems or "package units". An HVAC system consists of the unit itself and ductwork above the ceiling generally known as "plenum space". Plenum space is a part of a building that can facilitate air circulation for heating and air conditioning systems, by providing pathways for either heated/conditioned or return airflows, usually at greater than atmospheric pressure. In general, the effectiveness and efficiency of HVAC systems to filter out contaminants during the circulation process is based upon two factors:

 Air mixture – the amount of outside air brought in compared with the amount of inside, recirculated air it is mixed with, generally expressed as a percentage

 Filtration – the ability of the system to filter out and remove particles and contaminants from the air before it is circulated back into the room

The District's HVAC systems are equipped with "economizers" that vary the amount of outside air brought in depending the outside temperature and conditions. The filtration effectiveness of HVAC systems is measured by an industry standard known as Minimum Efficiency Reporting Value or MERV, expressed as a number from 1 to 20. Generally, the higher the MERV number, the denser the filter is and, therefore, the more particles and contaminants the filter captures before circulating back into the room. It is also generally true that the higher the MERV number, the less airflow the system creates, which decreases circulation cycles, causes the system to work harder, and increases the likelihood for system breakdowns. This reduces the efficiency of the system and its useful life. Consequently, decisions on the type of filter to use relative to COVID-19 transmission are not simple as multiple factors must be considered.

Currently our district uses MERV 8 filters that are changed 4X a year (January, April, July and October) and the condensate coils are cleaned 1X a year.

For the 2020-21 school year we will still be using the MERV 8 filters however we plan to change the filters 6X this year (July, September, November, January, March, May) and clean the condensate coils 2X a year.

Also the district plans to set the HVAC to run the circulating fan in the on position during the instructional day. This is to increase air flow even when the unit is not in the heating/cooling mode.

# Science behind soap

9/21/2020

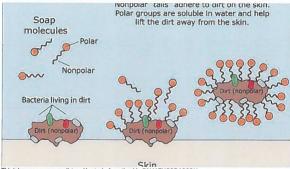

The coronavirus is no match for plain, old scap - here's the science behind it - MarketWatch

#### Outside the Box

The coronavirus is no match for plain, old soap here's the science behind it Published: April 8. 2020 at 4:20 am. ET

By Palli Thordarson

Soap works better than alcohol and disinfectants at destroying the structure of viruses

This is how soap removes dirt, and bacteria, from the skin. PALLI THORDARSON

Why does soap work so well on the new coronavirus and, indeed, most viruses? Because it is a selfassembled nanoparticle in which the weakest link is the lipid (fatty) bilayer.

That sounds scientific. Let me explain.

Soap dissolves the fat membrane, and the virus falls apart like a house of cards and "dies," or rather, it becomes inactive as viruses aren't really alive. Viruses can be active outside the body for hours, even days.

Disinfectants, or liquids, wipes, gels and creams containing alcohol (and soap) have a similar effect but https://www.marketwatch.com/story/deadly-vinuses-are-no-match-for-plain-old-scap-heres-the-science-behind-lk-2020-03-08 1/6

Covid Playgrounds and hand washing stations

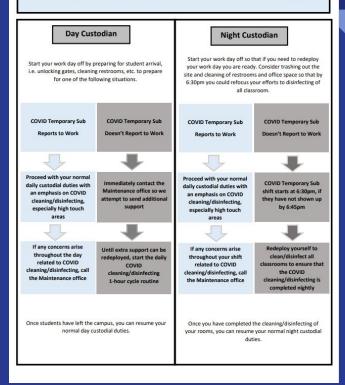

# Custodial Staffing Flowchart

#### **CUSTODIAL STAFFING FLOW CHART**

### LUSD Students/Staff in Self-Isolation/Quarantine; Protocol for Positive Cases (Dr. Natalie Winspear, Executive Director, Pupil Services)

#### **COVID-19 Symptom Decision Tree**

(Version: 9/22/202

#### At school, student or staff member develops any one of the following signs or symptoms:

Fever with or without chills/rigors (fever defined as T >100.0 that does not resolve within 30 min. without medication)
 Cough\* Shortness of breath Nasal congestion/rhinorrhea (runny nose)\* Sore throat
 Nausea, vomiting, or diarrhea\* Fatigue\* New loss of taste/smell Headache\*
 Muscle or body aches\* Poor feeding or poor appetite\*

\* Disregard this symptom if school personnel already aware of a chronic, pre-existing condition that causes the symptom. The nature of the presenting symptom (e.g., duration, intensity) must be consistent with the underlying chronic condition.

ACTION: Apply appropriate PPE; isolate student/staff member until sent home; recommend they reach health care provider for instructions. Note: Other infections can cause same symptoms (e.g., flu, strep, etc.) but these do not rule out COVID-19 as co-occurring

#### STUDENT / STAFF TO STAY HOME UNTIL... Note from healthcare provider With PCR COVID-19 viral test Without PCR Covid-19 viral test (Not antibody test; not antigen test) re: chronic illness Negative Positive A signed note from a licensed MD/DO/NP/PA (who manages that condition) must: confirm **Proof of negative** If note from MD/DO/NP/PA, or public health defines the chronic diagnosis (i.e., cites labs, date-oftest required. case as presumed COVID-19 virus (based on record when diagnosed); include provider's symptoms and circumstances), then: (a) consider contact information; explain how symptoms May return 72 notifying staff and parents of class (or bus, etc.) of are unrelated to COVID-19; and be hours after a potential exposure; and (b) in conjunction accompanied by signed consent for school symptoms with public health, exclude "close contacts" (using to interact with MD/DO/NP/PA. resolved. CDC definition) for 14 days from last day of exposure. Consider notification to school community May return to school immediately Isolate the case. May return when: **Consider individualized student** (a) 24 hours without fever (no meds) and (b) symptoms are **Retested or Not Retested** health plan to prevent any future improving AND (c) at least 10 days from symptom \*Proof of negative test not required unnecessary dismissals. onset or test date. EDUCATION If school becomes aware of one case in one cohort (shared bus, classroom, lab, team, etc.), then have district's/school's liaison contact the Public Health Department at 888-950-9905 to report the # HHSA case and for further direction on quarantine. For questions on exposure, symptoms, or other related LIVE WELL questions, please call the Epidemiology School Line at 619-692-8636 and leave a message. American Academy of Pediatrics

When does a staff member or student get sent home/or stay home?

### How often are we excluding staff and students?

| Data as of 10/7/2020 | Symptoms | Close Contact | Positive Test |
|----------------------|----------|---------------|---------------|
| Students             | 119      | 8             | 1*            |
| Staff                | 10       | 3             | 0             |

\*There have been 2 positive student cases since reopening however 1 was a DL Student

### **COVID Testing for Staff**

(Cesar Morales, Executive Director, HR)

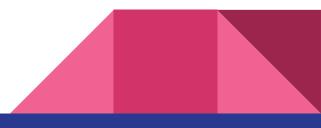

### **Employee Testing: Known Information**

Recommended Testing Frequency

45 Testing Sites in SD County

#### **Testing Costs**

- 100% of Employees Every 2 Months
- Average of 83 LUSD Employees / Week
- 1 Site in Lakeside (3 Opportunities in October)
- 4 Designated for School Personnel/Volunteers
- 40 Additional Sites Throughout SD County
- The test is done at no charge to school employees & school volunteers.

# ThoughtExchange Survey

## What is a Thought Exchange?

It's an online platform that allows groups to come together to have conversations about important topics or questions that exist for an organization or a community.

## Format of this exchange

One Yes/No question regarding extension of Phase 2.

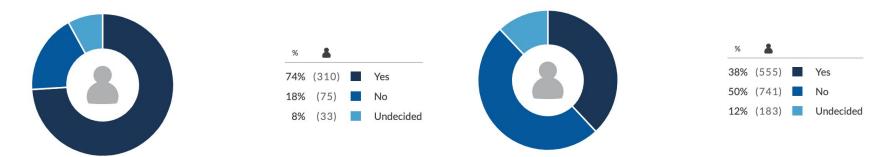

One open-ended question regarding extension of Phase 2, for dialogue and "exchange of ideas."

The same 2 questions were asked of staff and parents, in two separate exchanges running simultaneously for 6 days.

# Survey Question #1 (Yes/No)

Do you think it best to extend Phase 2 (hybrid instruction) beyond the planned ending date of October 16th?

#### LUSD Staff Responses

LUSD Parent/Guardian Responses

# **Survey Question #2 (open-ended)**

What are your thoughts about transitioning on October 19th to Phase 3, full in-person instruction for all students who desire to attend school 5 days a week?

# **Representative "top ranked" staff comments**

I do not feel it is safe to move to phase 3 yet. It would not be possible to maintain the cdc recommendation of 6 feet of distance in classrooms with so many students. There is not enough space.

**Increase risk of COVID during cold & flu season is likely.** Adding more students on our campuses will be too risky. It will be impossible to maintain safety guidelines with full campuses.

**Phase 2 has been successful, and everyone is just getting settled into the routine.** Colds and allergies are already starting to show up. Extending Phase 2 till after Winter break, seems to be logical and in the best interest of all.

# "Differences" View: Staff

#### Side A

Classrooms are not large enough to social distance with all children in attendance.

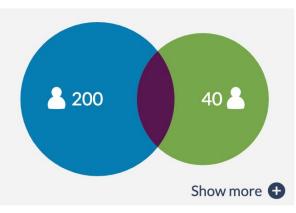

#### **★**4.9 **★**1.3

**Class sizes are too large.** If we come back full time, there isn't enough room in classrooms to space students apart 3 feet let along 6 ft.

★ 4.9 ★ 1.0

After almost three full weeks of the Phase 2/Hybrid model, the more I grow uncomfortable with the thought of moving forward to Phase 3. Managing half the number of students has been a difficult task. I am not sure how I am going to manage a full class with the guidelines in place.

★ 4.9 ★ 1.0

#### Side A/B Common (high)

Hire more teachers !!!!!!!! benefits our kids.....benefits our kids.....benefits our kids
★ 3.8 ★ 4.0

Lakeside Union School District was known for putting students first. Let's put our students first and do everything we can to protect them and their families.

#### Side B

I think students and families are ready to get back to normal. The hybrid model was a nice transition, but its time to get back to school.

#### ★ 1.1 ★ 5.0

I think we should fully open for those who want to attend in person five days a week. As a teacher and mom, I feel completely safe. The virus has over 99% recovery rate and effects on healthy people are minimal. Adults, like the children, need to have some normalcy back.

★ 1.1 ★ 5.0

I believe we are ready to go phase 3 Our staff is well prepared

★ 1.1 ★ 4.9

follow safety safe safe full full social season staff time kids think wearing cold hybrid flu change days distance feel now covid classroom week protocols soon back enough campus risk soon

# **Representative "top ranked" parent comments**

Thank you to the educator's and staff for the hard work and determination to continue to educate of children!

Kids safety should be most important

We must also give all of our teachers and admins grace. I don't think any of us could have planned for this. Being rude or ungrateful only makes everything worse and teaches our kids to act the same.

I do not think there has been or will be enough time in phase 2 to determine if it is really safe to go to Phase 3. Phase 2 allows for better social distancing and better monitoring of students in order for staff to keep them safe.

4.0 ★ ★ ★ ☆ (31≗) Ranked #4 of 1807

### **Representative "top ranked" parent comments**

I think it is a necessity for the kids to go to school full time. Online schooling isn't as efficient in teaching my children. They need to be around other kids.

**Since they have returned back to school their moods have greatly improved.** Isolation is not good for children's development or mental health.

**Children with IEP/504 plans should be on campus five days a week.** Children with autism or other learning disabilities aren't receiving adequate services through distance models.

It is important for the kids to be able to ask questions at any time mon-Friday on an assignment they don't understand. It is important for the students to understand 100% what they are learning

# "Differences" View: Parents

#### Side A

Kids need to be back in school 5 days a week!! Kids need to learn 5 days in the classroom.

★ 5.0 ★ 1.1

We are ready and our students are ready! All of the safety measures are in place and we don't want our students falling behind.

★ 4.9 ★ 1.0

The schools need to be open! Our children need the interaction with kids their own age.

#### ★ 5.0 ★ 1.2

I think they should return to school full time Children will receive a better education with teachers in person

★ 5.0 ★ 1.2

#### Side A/B Common (high)

Thank you to the educator's and staff for the hard work and determination to continue to educate of children!

**★**4.4 **★**4.3

LUSD and individual schools should explore creating and using more outdoor learning spaces as temperatures cool. This would decrease prolonged indoor contact and reduce spread and risk for teachers and

#### Side B

My daughter has been doing well at home. I feel we should wait until after the new year when the flu season and holiday's are over. My daughter is learning responsibility and likes looking up what she needs to do and following instruction. Her teacher is great!!!

★ 1.1 ★ 5.0

**Social distancing is impossible in phase 3.** To keep kids/staff safe, we need to continue with phase 2, so that everyone can social distance, shared equipment can be sanitized. Minimize exposu

★ 1.2 ★ 4.9

I think it is best to extend phase 2. For the safety of our students and staff I don't think we should rush into phase 3.

★ 1.2 ★ 4.8

cases open classroom important hybrid interaction distance phase ready cov phase ready wear <sub>flu</sub> children **SCIASS** sizes masks season **Me** parents safe want work back learning education child week person soon instruction extend great like think

# **District Staff Takeaways/Next steps**

- Continue to reinforce and refine safety protocols
- Continue to work to improve services for special needs students
- Analyze instructional delivery model for improvements
- Assess academic and social-emotional needs of students for planning and improved services
- Continue to analyze survey results for specific thoughts on needed improvements
- A link to full survey results will go out to staff and parents tomorrow

### Phase 3 Options for the Board of Trustees to Consider

## **Options**

- 1. Continue with phase 3 as planned on Oct. 19, with 5 days in-person instruction for all students desiring to return.
- 2. Begin phase 3 on November 16 (the first day of trimester 2)
- 3. Postpone phase 3 for consideration at the January Board of Trustees meeting
- 4. Other

**Questions?**
