WHAT IS EXPEDITIONARY LEARNING?

Expeditionary Learning (EL) is a teaching and learning approach that:

- emphasizes high-quality student work,
- supports character development,
- encourages community involvement.

 Education

We use project-based learning and interdisciplinary teaching to help students build deep understanding of academic content and develop skills that will serve them in all aspects of their lives.

WE BELIEVE:

Students learn best by doing, and we provide opportunities for students to engage in authentic, challenging, and meaningful experiences both inside and outside of the classroom. Our students are challenged to think critically, collaborate effectively, and communicate clearly.

FEATURES OF EL

Active Learning

Teamwork

Character

HOW DOES EL WORK?

Our curriculum is designed around "learning expeditions" that are multi-disciplinary, project-based units of study. Learning expeditions provide opportunities for students to work on real-world problems, engage with community partners, and demonstrate their learning through high-quality products and performances.

WHAT ARE THE BENEFITS?

- A deeper understanding of academic content
- Development of critical thinking and problem-solving skills
- Increased creativity and innovation
- Development of teamwork and collaboration skills
- Enhanced communication skills
- Increased engagement and motivation
- A stronger sense of community and connection

OUR EXPERIENCE AND RECOMMENDATION
